Job Title:

Ed-Tech Content Developer

Job Location:

Mumbai, India

Job Summary:

We are seeking an experienced Ed-Tech Content Developer to join our team at MindScape Learning, a cutting-edge ed-tech startup. The Ed-Tech Content Developer will be responsible for creating engaging and interactive educational content for our platform, which leverages technology to deliver personalized, interactive, and engaging educational experiences to students of all ages.

Reporting to:

Director of Content Development

Working conditions:

The Ed-Tech Content Developer will work in a fast-paced, deadline-driven environment and will be expected to work collaboratively with other members of the content development team.

Job Duties:

- Design, develop, and maintain engaging and interactive educational content for our platform
- Collaborate with the product development team to ensure that the content is aligned with the platform's overall design and goals
- Research and stay up-to-date with the latest trends and developments in the ed-tech industry
- Conduct user testing to ensure that the content is effective and engaging
- Evaluate and iterate on the content to improve its effectiveness over time

Machines to be used:

- Personal computer
- Educational software and tools

Hazards:

- None

Roles and duties:

- Design and develop engaging and interactive educational content
- Collaborate with the product development team to ensure that the content is aligned with the platform's overall design and goals

- Research and stay up-to-date with the latest trends and developments in the ed-tech industry
- Conduct user testing to ensure that the content is effective and engaging
- Evaluate and iterate on the content to improve its effectiveness over time

Salary range:

INR 4,00,000 - 6,00,000 per annum

Skills needed:

- Strong experience in designing and developing engaging and interactive educational content
- Excellent written and verbal communication skills
- Strong research and analytical skills
- Ability to work well in a fast-paced, deadline-driven environment
- Familiarity with the latest trends and developments in the ed-tech industry

Educational qualifications:

- Bachelor's degree in education, instructional design, or a related field
- Master's degree in education, instructional design, or a related field is a plus

Organisational Goals:

- Deliver personalized, interactive, and engaging educational experiences to students of all ages
- Leverage technology and innovative teaching methods to help students develop critical thinking and problem-solving skills
- Offer a range of resources to support students' learning journey
- Generate revenue through a combination of subscription-based services and advertising.
